

I'm a computer science graduate, currently going to become a master student, and diving into deep learning world

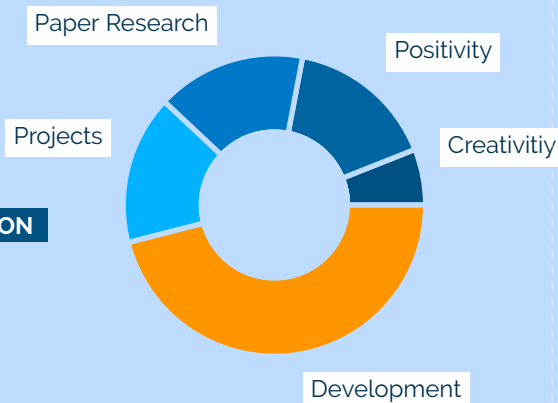

as latest degree from  
**National Sun Yer-Sen University**

And I am always looking for new exciting and interdisciplinary projects worldwide.

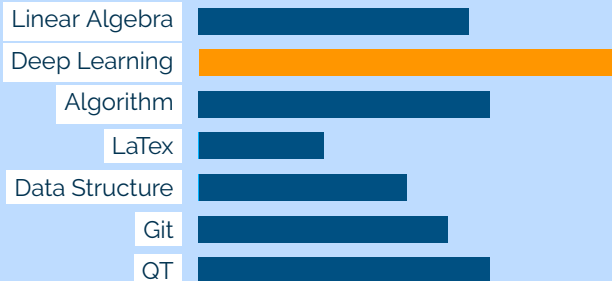

## SKILLS AND TECHNOLOGIES

The biggest part I contribute to my previous project is model training.

## ENGLISH SKILL VERIFICATION

📖 TOEIC L&R : 900  
📖 GSAT English : 14

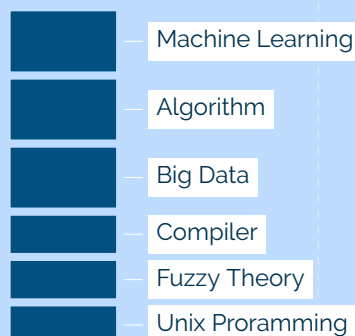

Currently, I develop deep learning model for various application. By the way, algorithm is one of my favorite course in college. Thanks to Advanced Algorithm course, I've practiced developing GUI with QT.

## HIGH SCORE COURSES

of important courses  
**Got A+**

I make my best endovers one or two courses every semester, just in case I can learn from them in a solid manner. In the end of college, I am 18 out of 51 in the class. I especially learn more than other classmates in those courses.

## EXPERIENCE AND EDUCATION
